

PEWE Clarification

Innovative DAF & Gravity Settlers

PEWE Innovative Quality

PEWE is an innovative leading company in the field of industrial water and wastewater treatment systems. PEWE offers products worldwide to the Food, Petrochem, Pharma, Metals, Electronics, other industries and Municipal market. The PEWE premier portfolio of clarification systems cover the full range of solids removal possibilities. Flotation, settling and oil systems are available for very high solids sludge thickening, mixed settleable solids, as well standard suspended solids fare.

The unique technology built into each PEWE clarification system maximizes TSS and FOG removal while minimizing chemistry usage and sludge production. With the **Tru Counter-Cross Flo**® plate pack, **ParaLam Weir**® system, integrated pipe flocculator and **ROGUE MAX RGT**® aeration, PEWE applies the latest in technology innovation to a given system design. Each system operates by precise control of the PEWE automated panel. PEWE products and systems are designed in-house and produced under tight quality control.

PEWE Clarification Systems

*“Technical Value
is Performance”*

HD²XLRator® DAF.....

The unique technology built into each PEWE **HD²XLRator**® DAF system maximizes TSS removal while minimizing chemistry usage and sludge production. With the **Tru Counter-Cross Flo**® plate pack, **ParaLam Weir**® system, integrated pipe flocculator and **ROGUE MAX RGT**® aeration, the **HD²XLRator**® DAF operates by precise control of the **Command Control**® automated panel.

G²-SEP® Settler....

The unique technology built into each PEWE **G²-SEP**® **Plate Settler** maximizes settleable solids removal while minimizing chemistry usage. The chassis and vessel are constructed of AISI 304SS. With the **Tru Counter Flo**® plate pack, adjustable riser weir system, optional pipe flocculator, the **G²-SEP**® **Plate Settler** operates by precise control of the **Command Control**® automated panel.

Poly-E²® DAF.....

The unique technology built into each PEWE **Poly-E²**® DAF system maximizes TSS removal while minimizing chemistry usage and sludge production. With the **Tru Counter Flo**® plate pack, adjustable weir system, integrated pipe flocculator and **ROGUE MAX RGT**® aeration, the **Poly-E²**® operates by precise control of the **Command Control**® automated panel.
