

Command Control®

Process Automation Systems

Automation Ease

Command Control® automated systems ensure safe and efficient process and wastewater operations. We build custom controls and associated motor control centers will deliver consistent performance and measurable results. Operators will find the standard color touch-screen and multi-lingual interface easy to navigate while providing a comprehensive system overview. Data will be readily available and timely.

PEWE fully automated modular process systems:

- Electrical PLC panel design
- UL508 and CSA certification
- PLC and HMI programming
- Field start-up and commissioning
- Web based remote support

Command Control®

**“Custom Quality....
When Experience Counts!”**

Architecture & SCADA Design

Command Control® products and systems are designed in-house and then produced under tight quality control. Using the latest CAD, programming software, non-proprietary technology and experience **Command Control®** provides support for years. Auquix offers products nationwide to the Food, Petrochem, Pharma, Metal, Electronics and Municipal markets.

COMPACT SYSTEM INTEGRATION PULLS IT ALL TOGETHER

Why Clients Use Command Control®

- Experienced technical services personnel
- NEMA 4 and corrosion resistant enclosures
- Industry proven components– Rockwell, Siemens
- State-of-the-art technology
- Operator friendly interface
- ISA standard labeling system
