Water Conservation

As the economics and need for clean water continues to grow in both the industrial and public sector, **AUQUIX®** represents the best available technology solutions to meet your needs. These process water equipment products are carefully selected to economically achieve your water conservation goals.

Whether potable water pretreatment, process water reuse or wastewater recycle **AUQUIX®** has an answer. These advanced systems come fully engineered and time tested. From purchase order through delivery and installation you will receive seamless support.

Ask about the AUQUIX® Water Reuse.

Compliance and Cost Saving

Compliance costs. An expert once said, "They never go away and they never go down." While this is more right than wrong, there are always methods to keep costs to a minimum.....and we will work to bring them to your organization.

AUQUIX® offers complete package system solutions to serve your water and wastewater needs. By choosing from an array of reputable manufacturers you are assured of getting the right product for each situation at a competitive price.

AUQUIX® brings it all together in a convenient integrated package solution, with all of the guess work taken out of it for you.

Ask about AUQUIX® Turn-Key Solutions.

Wastewater Equipment	
Screening	Side-hill, Rotary Internal and External
Oil/Water Separation	Above Ground
Clarification	DAF Plate Pack and Open
Biological Treatment	Aerobic, Anaerobic
Dewatering	Belt, Screw, Plate and Frame
Control Systems	Manual, Automated
Aeration Upgrade	Regenerative Turbine Pumps
Accessories	pH, Polymer, Tanks, Pumps, Level Control

*“Technical Value
is Performance”*

Test & Audit Benefits

AUQUIX® conducts test and treatability analysis on process and wastewater systems for water characterization, determining the system “best” design specifications and management audit purposes. A system can only be built and operated at its maximum efficiency with quality data.

AUQUIX® provides both annual and quarterly auditing services. We will conduct an on-site review of the operation with interviews, an equipment survey, chemistry check, procedures, sampling methods, safety and then report to you deficiencies and make recommendations. An **AUQUIX®** WWT Score Sheet quantifies your progress.

Ask about **AUQUIX®** Independent Verification.

Training Saves Money

AUQUIX® provides up to date training of management and operating personnel on the proven techniques and latest methods for successful wastewater system operation. Attention is paid to chemistry, maintenance and safety. The training goal is to assist your organization in obtaining repeatable results. Better training saves money over the long haul.
