

Ten Commandments Of Wastewater TSS Treatment

- 1. Prescreen the Water**
- 2. Provide Adequate Flow & Load Equalization**
- 3. Properly pH Control the Water**
- 4. Purchase a Plate Pack Stainless Steel DAF**
- 5. Use Regenerative Turbine 20 Micron Aeration**
- 6. Use a Self Draining/Cleaning DAF**
- 7. Use Performance Tested Liquid Chemistry**
- 8. Use a Flow Proportional Makedown System**
- 9. Properly Locate Chemical Injection Points**
- 10. Thou Shalt not Undersize the System**

Plus: Keep the System Properly Maintained & Clean

Stuart Ward, General Manager
